SUMMARY

Next.js Frontend Developer with 2+ years of experience building high-performance, scalable web applications using Next.js, React.js, TypeScript, and JavaScript (ES6+). Skilled in modern headless architectures, integrating content from Sitecore JSS and Adobe Experience Manager (AEM). Strong expertise in GraphQL (AppSync) and REST API integrations, optimizing data flow for fast, lightweight UI delivery. Experienced in SSR, SSG, and ISR for SEO-focused, high-speed web experiences.

Owned multiple end-to-end features from development through UAT and now preparing for go-live, with upcoming hypercare responsibilities to ensure production stability and smooth rollout. Experienced in state management, architecture decisions, and CI/CD workflows (Git, GitHub, Azure DevOps). Adept at translating complex requirements into clean, maintainable code while ensuring platform governance, accessibility, and a superior user experience. Proven ability to deliver in Agile environments with a strong understanding of the full data lifecycle from CMS to front-end presentation.

SKILLS

Programming Languages: JavaScript (ES6+), TypeScript

Frontend Frameworks & Libraries: Next.js(13+), React.js (18), Sitecore JSS, AEM (Adobe Experience Manager), GraphQL, Apollo GraphQL, React Query, Redux, Context API

Web Technologies: HTML5, CSS3, Tailwind CSS, Bootstrap, SASS

API & Integrations: GraphQL, REST API

Tools & Platforms: Git, GitHub, Azure DevOps

Rendering & Performance: SSR, SSG, code splitting, Lazy Loading, Caching

Build & DevOps: CI/CD(Azure DevOps), Webpack, Vite, npm

CMS & Headless Architecture: Sitecore JSS, Adobe Experience Manager

Agile & Collaboration: JIRA, Scrum, User Story grooming, UAT Coordination, Hypercare

Languages English

CERTIFICATIONS

GH300: GitHub Copilot

AWARDS

Wall Of Fame

Accenture

Recognized for Individual performance and extra mile achievement.

ACE Award

Accenture

Oct '25

Recognized for excellence in development and team delivery.

EXPERIENCE

Packaged App Development Analyst

Jul '25 — Present

Accenture, Hackensack Meridian Health

Chennai, India

- Developed modular, reusable frontend components using **Next.js and React**, aligned with Sitecore JSS headless architecture for seamless content delivery.
- Built components mapped directly to **Sitecore renderings**, ensuring accurate integration between backend content authoring and frontend presentation.
- Consumed and integrated **GraphQL APIs** to deliver dynamic, personalized content across patient-facing pages.
- Implemented scalable styling using **SASS** with BEM methodology, improving maintainability and reducing CSS overhead.
- Collaborated closely with **Sitecore backend developers, content authors, and business analysts** to analyze requirements and translate them into clear, functional frontend solutions tailored to healthcare workflows.
- Leveraged Next.js features like **SSR, SSG, and ISR** to boost page performance, SEO, and load times for large content-driven pages.
- Supported environment deployments and CI/CD pipelines through **Azure DevOps**, ensuring version control, build consistency, and smooth releases.
- Actively participated in Agile ceremonies—refinement, sprint planning, and demos—providing effort estimates, feasibility insights, and impact analysis.
- Provided support for UAT, **go-live and hypercare**, ensuring production stability and rapid issue resolution.

- **Domain Expertise:** Healthcare & Patient Engagement – delivering accessible, secure, and performance-optimized digital experiences for hospital systems.
- **Tech Stack:** Next.js, React.js, TypeScript, Sitecore JSS (Headless CMS), GraphQL, SASS, Azure DevOps

Packaged App Development Associate

Dec '23 — Jun '25

Accenture, Mastercard

Chennai, India

- Built reusable, scalable UI components using **Next.js, React, and TypeScript**, powering key Mastercard customer-facing modules.
- Integrated frontend components with **GraphQL (AWS AppSync)** by writing **queries, fragments, and mutations**, enabling real-time, optimized data flow.
- Consumed structured content from **AEM headless CMS**, mapping renderings and JSON responses to frontend components with high accuracy.
- Developed responsive layouts using **Tailwind CSS**, ensuring consistent design across multiple device breakpoints.
- Worked closely with **client product owners and business analysts** to deeply understand functional requirements, translating business logic that aligned with Mastercard's UX and compliance standards.
- Collaborated with backend, QA, and DevOps teams to streamline build pipelines using **Azure DevOps**, supporting deployments through multiple environments.
- Participated in requirement breakdown, sprint planning, and UAT support, ensuring smooth handoff and stakeholder satisfaction.
- **Domain Expertise:** Payments & Financial Services – delivering high-performance, secure frontend experiences used across Mastercard portals.
- **Tech Stack:** Next.js, React.js, TypeScript, Tailwind CSS, Zustand, GraphQL (Apollo Client & AWS AppSync), AEM (Headless CMS), Azure DevOps

EDUCATION

Bachelor of Engineering in Computer Science and Engineering, SRM VALLIAMMAI
ENGINEERING COLLEGE

Jul '19 — May '23
Chennai, India
